Let's Start!

What is Anthropology?

Learning Outcome

Describe complicated or unusual events in the past through a wider range of B1 language in both work and social contexts.

Can Do Statements

- I can talk about subjects of study.
- I can talk about possibility and certainty.
- I can talk about things that happened or have happened.

Ask your partner:

- What do you know about your country's past?
- What other people lived there long ago?
- What did they leave behind?

Let's Explore!

There are many questions **raised*** in anthropology.

* When you "raise" a question, you bring it up to talk about.

Instructions: Read the text aloud.

Have you ever wondered what humans were like long ago? Have you thought about what life is like in other cultures? These are questions raised in anthropology - the science that studies human beings. You may wonder where anthropological studies begin. It might surprise you that originally, it was part of natural history and the study of animals.

At first, anthropologists mainly studied non-Western cultures and peoples. Of course, like other scientists, they collected artifacts. By studying customs in conjunction with these artifacts, they were, in fact, able to create pictures of past societies.

Now, anthropology has become more like a social science. Of course the change in approach brought a change in method. In fact, now, anthropologists look for connections between various aspects of society rather than just the way it's organized. For example, they might look at the connections between holiday customs and religious beliefs.

Recently, many new branches of anthropology have developed. Physical anthropology began to look at how our species, homo sapiens, evolved. Urban anthropology opened studies on human experiences and social relations in urban areas.

Of course, no matter which branch of anthropology they work in, the goal of anthropologists is to find patterns and connections. These connections could allow them to shed light on what makes us different and what makes us the same.

Let's Practice!

How has anthropology changed? How was it before?

Instructions: Match the two parts of the sentence from Column A to Column B:

Column A

1. At first, anthropologists
2. At that time, urban anthropology
3. Since then, anthropology
4. Now, anthropologists
5. Have you ever

Column B

- a. thought about the artifacts ancient people made?
- b. focused on non-Western cultures.
- c. opened studies on human experiences in urban areas.
- d. have changed in their approach.
- e. has become more like a social science.

Let's Practice!

You may want to know more about anthropology.

Instructions: Read the sentences. Write the correct option to complete the sentences. Use the options from the box below.

may wonder where / may not find / could allow
them / might look at / might surprise you

1. You _____ anthropological studies began.
2. You _____ this anthropology class very interesting.
3. It _____ that originally, it was part of natural history and the study of animals.
4. They _____ the connections between holiday customs and religious beliefs.
5. These connections _____ to shed light on what makes us different and what makes us the same.

Extension Activity

Find out about people from the past in your country.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Look up your country and anthropology together.
- Find out about a people that lived in your country in the past.
- Make notes on where they lived, what they looked like and what they did.
- Find out what they have left behind. Is it pottery, art, traditions?
- Now write 120 words in two paragraphs - one for the past and one for the time up to now.
- Read your paragraphs to a partner.
- Discuss what you have told them.

Self-Assessment

Yes No

I talk about people from the past in my country from an anthropological perspective.

☐ ☐

I talk about possibility and certainty.

☐ ☐

I talk about things that happened or have happened.

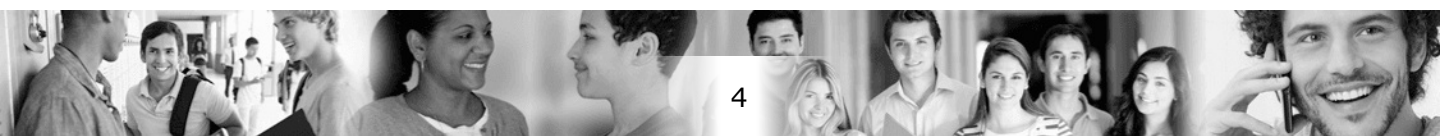

☐ ☐

I share my findings with a partner and discuss them.

☐ ☐

Target Words

- anthropological** (adjective): concerned with the study of the development and origin of human beings
e.g. You may wonder where anthropological studies began.
- anthropology** (noun): the study of human social groups and their customs
e.g. There are questions raised in anthropology - the science that studies human beings.
- natural history** (noun): the study of living beings and their environments
e.g. Originally, anthropology was part of natural history and the study of animals.
- social science** (noun): the study of how people live together in a society
e.g. Anthropology has become more like a social science.
- branch** (noun): something that develops or derives from a principal source or origin
e.g. Recently, many new branches of anthropology have developed.
- artifact** (noun): an object produced or shaped by human craft, especially a tool or a weapon
e.g. Like other scientists, anthropologists collected artifacts.
- in conjunction with** (expression): combined with
e.g. By studying customs in conjunction with these artifacts, they were able to create pictures of past societies.
- urban** (adjective): relating to towns and cities, or happening there
e.g. Urban anthropology opened studies on human experiences and social relations in urban areas.
- to shed light on** (expression): to make something clearer
e.g. These connections could allow anthropologists to shed light on what makes us different and what makes us the same.

Learning Points

Modals for Possibility and Certainty

You can use modals to talk about degrees of certainty.

You use them to describe what is possible, probable, definite or impossible.

You can use *must*, *may*, *might*, and *could* to describe degrees of certainty.

Must = it's very likely

Must not/Could not/Can't = it's not possible

May/Might/Can/Could = it's possible

May not/Might not = it's possible this is not true

Modal	Meaning
<i>You may wonder where anthropological studies began.</i>	It's possible that you wonder.
<i>It might surprise you that originally, it was part of natural history and the study of animals.</i>	It's possible that this will surprise you.
<i>They might look at the connections between holiday customs and religious beliefs.</i>	It's possible that they will look at those particular connections.
<i>These connections could allow them to shed light on what makes us different and what makes us the same.</i>	It's possible that we may get some insight.
<i>You may not find this anthropology class very interesting.</i>	It's possible that you will not find this interesting.

Learning Points

Present Perfect Tense vs. Past Simple

You use the Present Perfect tense to talk about a finished action or event that is connected to the present in some way.

You use the Simple Past tense to talk about a finished action or event **not** necessarily connected to the present.

When you use the Present Perfect tense, you think about the past and present together. There is some connection between what happened in the past and now.

To help you decide whether you should use the Present Perfect tense or the Past Simple tense, ask yourself the question 'When?'

If you can answer the question 'When?', the past time is stated or inferred or understood. Use the Past Simple. There is no connection to the present.

If you cannot answer the question 'When?', because the time is not stated or not important, then choose the Present Perfect tense. There is instead a connection to the present.

Sentence	When?
<i>Have you ever wondered what humans were like long ago?</i>	at any time from the past to now
<i>Now, anthropology has become more like a social science.</i>	from the past to now
<i>At first, anthropologists mainly studied non-Western cultures and peoples.</i>	when they first started
<i>Physical anthropology began to look at how our species, homo sapiens, evolved.</i>	when it became something to study

Examples:

- *Have you thought about what life is like in other cultures?*
- *Recently, many new branches of anthropology have developed.*
- *Of course the change in approach brought a change in method.*
- *Urban anthropology opened studies on human experiences and social relations in urban areas.*
