Let's Start!

What courses do you think you'd find interesting?

Learning Outcome

Describe complicated or unusual events in the past through a wider range of B1 language in both work and social contexts.

Can Do Statements

- I can talk about subjects of study.
- I can talk about cause and effect.
- I can talk about things that happened or have happened.

Ask your partner:

- What subjects do you find interesting to study?
- When did you first become interested in them?

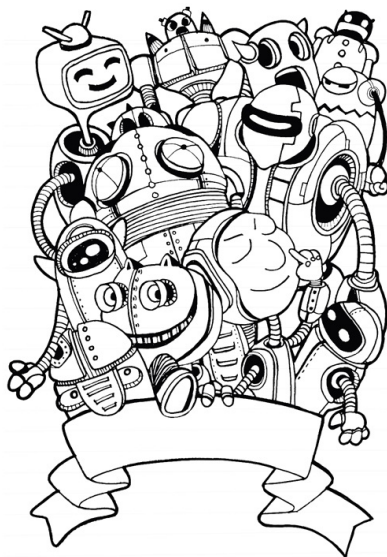

Let's Explore!

There are many questions **raised*** in anthropology.

* When you "raise" a question, you bring it up to talk about.

Instructions: Read the text aloud.

- Ron:** Susan, have you decided what you want to study yet?
- Susan:** I have really started to enjoy my anthropology course. I've been fascinated by other cultures and learning about customs and ways of life that are different from ours for years. If I major in anthropology, I'll get to travel to other parts of the world. If I do well, I could even get a job abroad when I finish. What about you? Did you decide to stick with sciences?
- Ron:** For now I've opted for psychology. Learning how the brain works caught my interest. But if I continue with it, I won't be able to pursue my real interest.
- Susan:** Which is?
- Ron:** Robotics. If I want to study that, I'll have to transfer to engineering.
- Susan:** Really? I didn't know you could study robotics here!
- Ron:** You can! It's fascinating! Did you know that robots have already started to perform surgical operations? Of course they've worked in factories and automobile plants for a while now. I also read an article about Japanese robots designed to help physically disabled people.
- Susan:** Sounds great. However, if we don't watch out, they'll replace people! I do want to get a job when I graduate.
- Ron:** Don't worry, Susan. As far as I know, there aren't any robot anthropologists yet!

Let's Practice!

Ron and Susan are wondering about their future.

Instructions: Read the sentences. Circle all the incorrect words in the sentences. Write the sentences correctly.

1. If I major in anthropology I'll getting to travel to other parts of the world.

2. I won't be able to pursue my real interest if I continued here.

3. If I want to study that, I'll had to transfer to engineering.

4. If I done well, I could even get a job abroad when I finish.

5. If we didn't watch out, they'll replace people!

Let's Practice!

Ron and Susan talk about their experiences choosing their degrees.

Instructions: Organize the mystery sentences. Read the sentences aloud. Check your pronunciation with your instructor.

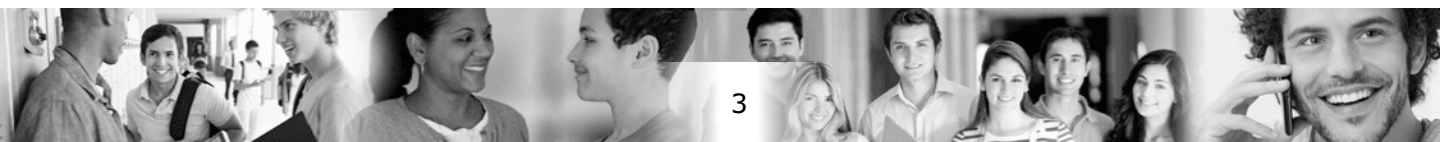

1. what / Have / you / ? / want / to / you / yet / study / decided

2. psychology. / opted / now / for / I've / For

3. have / already / to / perform / surgical / Did / you / robots / that / know / operations? / started

4. you / could / I / here! / didn't / Really? / study / robotics / know

5. fascinated / and / by / life. / other / ways / learning / cultures, / about / of / 've / been / and / customs / I

Extension Activity

Get some information about college or university courses.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online or to a library to find a university or college catalogue.
- Look through the courses and read about different areas of study.
- Write down 10 courses that you find interesting and note why you think that.
- Tell a partner about the courses and explain why'd like to study them (even if you cannot).

Self-Assessment

Yes No

I talk about subjects of study.

☐ ☐

I talk about hypothetical situations.

☐ ☐

I talk about courses that have interested me and explain why.

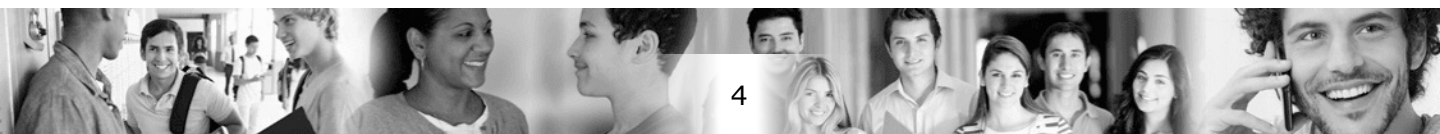

☐ ☐

I share my ideas with a partner and discuss them.

☐ ☐

Target Words

- anthropologist** (noun): a person who specializes in anthropology
e.g. If Susan majors in anthropology, she will be a recognized anthropologist.
- custom** (noun): something that people do that is traditional or usual
e.g. I've been learning about customs and ways of life that are different from ours for years.
- to major** (verb): to follow a major course of study
e.g. If I major in anthropology, I'll get to travel to other parts of the world.
- psychology** (noun): the science of the mind or of mental states and processes
e.g. For now I've opted for psychology. Learning how the brain works caught my interest.
- to stick with** (verb): to continue to do or use something, and not change it
e.g. What about you? Did you decide to stick with sciences?
- engineering** (noun): the activity of designing things such as roads, railways, bridges, or machines
e.g. If I want to study robotics, I'll have to transfer to engineering.
- surgical** (adjective): connected with medical operations, or used for medical operations
e.g. Did you know that robots have already started to perform surgical operations?
- physically** (adjective): in a way that is related to your body or appearance
e.g. There are Japanese robots designed to help physically challenged people.
- disabled** (adjective): unable to use part of their body or brain properly because of injury or disease
e.g. There are Japanese robots designed to help physically disabled people.

Learning Points

The First Conditional

You can use the first conditional to talk about actions and situations in the future.

There are two parts to the sentence. One part is the **condition**. The other part is the **result**.

Form:

If + subject + Simple Present tense + subject + will/won't

You use a comma after the condition in this form.

You can flip the two parts of the sentence so that the result comes first. You don't use a comma if you start with the result clause. It can be in interrogative form.

Form:

Will/Won't + subject + if + subject + Simple Present tense ?

Condition	Result
<i>If I major in anthropology,</i>	<i>I'll get to travel to other parts of the world.</i>
Result	Condition
<i>I'll get to travel to other parts of the world</i>	<i>if I major in anthropology.</i>

Examples:

- *If I do well, I could even get a job abroad when I finish.*
- *But, if I continue with it, I won't be able to pursue my real interest.*
- *If I want to study that, I'll have to transfer to engineering.*
- *However, if we don't watch out, they'll replace people!*

Learning Points

Present Perfect Tense vs. Past Simple

You use the Present Perfect tense to talk about a finished action or event that is connected to the present in some way.

You use the Simple Past tense to talk about a finished action or event **not** necessarily connected to the present.

You can use the Present Perfect tense to talk about experiences. When you use the Present Perfect tense, you think about the past and present together. There is some connection between what happened in the past and now.

To help you decide whether you should use the Present Perfect tense or the Past Simple tense, ask yourself the question 'When?'

If you can answer the question 'When?', because the past time is stated or inferred or understood, use the Past Simple. There is no connection to the present.

If the you cannot answer the question 'When?', because the time is not stated or not important, then choose the Present Perfect tense. There is instead a connection to the present.

Sentence	When?
<i>Have you decided what you want to study yet?</i>	at any time from the past to now
<i>I have really started to enjoy my anthropology course.</i>	from the recent past to now
<i>Did you decide to stick with sciences?</i>	when you were considering it
<i>I also read an article about Japanese robots designed to help physically disabled people.</i>	when I saw it in the magazine

Examples:

- *I've been fascinated by other cultures for years.*
- *For now I've opted for psychology.*
- *Did you know that robots have already started to perform surgical operations?*
- *Of course they've worked in factories and automobile plants for a while now.*
- *Learning how the brain works caught my interest.*
- *I didn't know you could study robotics here!*
