Let's Start!

Let's review!

Learning Outcome

Describe events in the past through a wider range of B1 language in both work and social contexts.

Ask your partner:

- What do think it's like to train to be an astronaut?
- How well do you think you would do in a long journey out into space?

Can Do Statements

- I can talk about technology and subjects of study.
- I can talk about cause and effect.
- I can express possibility and certainty.

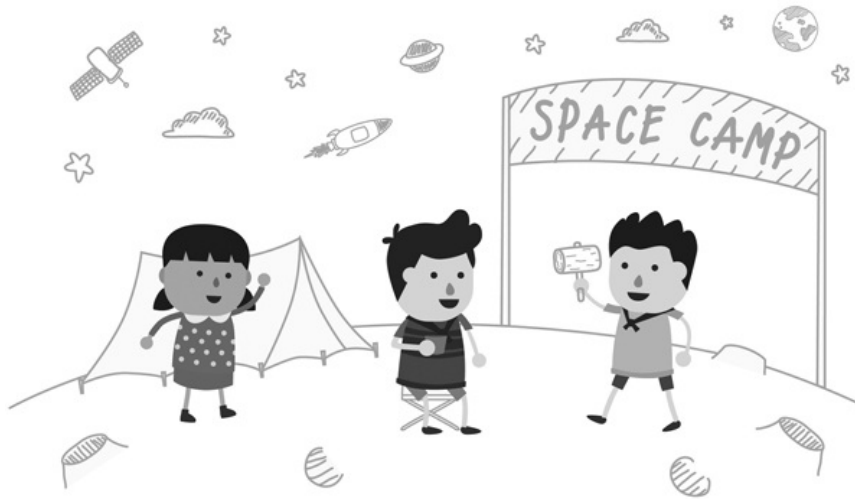

Let's Explore!

Are your children NASA **wannabes***?

* A "wannabe" is someone who wants to be just like someone else.

Instructions: Read the text aloud.

If your children dream of becoming astronauts, you will want to send them to space camp. It's the place that can make their dreams come true! If you can afford it, the five-day program in the US will teach them all it takes to be an astronaut.

They would get to experience what astronauts go through on a space mission. Simulators would be used so they could experience what it's like to be in the heavens.

If they want to know how it feels to move under the moon's low gravitational pull, they can. If they want to know what it's like to float in a spacecraft that's orbiting Earth, here's where they can do that.

In the space camp, children learn about the procedures that are involved in space travel. If they are interested in making their own rockets, we'll help them. They also get to fit themselves into space suits to see how difficult it is to control their movements in them. They might even be persuaded to try freeze-dried space food! (Nothing genetically modified here!)

By the end of the program, campers should be prepared for the final test - one hour at the helm of the a space shuttle simulator. Does it sound like fun? Well, most NASA wannabes say that space camp "is a real blast."

Let's Practice!

What can children do at space camp?

Instructions: Select all the modals in the paragraph.

- The space camp is the place that can make children's dreams come true. Simulators would be used so they can live an extraordinary experience. Children can learn about the procedures that are involved in space travel. They might be persuaded to try space food. When the program finishes, participants should be prepared for the final test.

Let's Practice!

There is some important information missing. What is it?

Instructions: Read the sentences. Write the missing words. Use words from the box below.

• can • experience • might • should • would

1. Children _____ be prepared for the final test.
2. Kids _____ get to experience what astronauts go through on a space mission.
3. Simulators would be used to _____ what it's like in space.
4. Children _____ be persuaded to try space food.
5. Space camp is the place where children _____ become astronauts.

Extension Activity

Ask to go to Space Camp!

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Imagine that you are 10 years old and interested in Space Camp.
- Write a letter asking your parents if you can go.
- Say what you'll do if you go there.
- Say how you will feel if they allow it.
- Explain what you will be like for the rest of the year if they give you this opportunity.
- Read your letter aloud to a partner.

Self-Assessment

Yes

No

I write a letter asking my parent if I can go to space camp.

☐ ☐

I use cause and effect clauses to say what I will do and feel.

☐ ☐

I say how I will act if allowed to go.

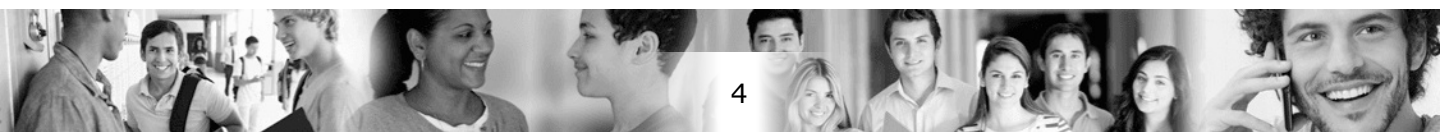

☐ ☐

I share my letter with a partner.

☐ ☐

Target Words

- modified** (adjective): changed in form or character
e.g. How many of the foods you eat are genetically modified?
- to fit** (verb): to be adapted to or suitable for (a purpose, object, occasion, etc.)
e.g. They said he could be fitted with a robotic prosthesis.
- to control** (verb): to dominate or command
e.g. The prosthesis could be controlled with his mind.
- helm** (noun): in charge of something or in the position of a leader
e.g. One hour at the helm of the a space shuttle simulator.
- procedure** (noun): a way of performing or effecting something
e.g. If they have the procedure, they may develop serious complications following it.
- heavens** (noun): the space that surrounds the Earth
e.g. With their eyes on the heavens, men began to wonder whether the stars and planets they saw could be explored.
- gravitational** (adjective): connected or pulled together by a strong force
e.g. The Earth's strong gravitational pull would have to be overcome before rockets could escape the stratosphere.
- to orbit** (verb): to follow a circular path around another object like a sun or a planet
e.g. The US and the Soviet Union took turns sending satellites and men into orbit.
- NASA** (noun): an agency of the USA whose acronym means National Aeronautics and Space Administration
e.g. If you log onto the NASA website, you will see pictures and data sent back by dozens of space probes.

Learning Points

The First Conditional

You use the First Conditional to talk about real possibilities in the future.

You use the First Conditional to say it's possible that you will do something. In that condition, something else will happen.

If clause	Main Clause
<i>If your children dream of becoming astronauts,</i>	<i>you will want to send them to space camp.</i>
<i>If they want to know how it feels to move under the moon's low gravitational pull,</i>	<i>they can.</i>

Examples:

- *If you can afford it, the five-day program in the US will teach them all it takes to be an astronaut.*
- *If they want to know how it feels to move under the moon's low gravitational pull, they can.*
- *If they want to know what it's like to float in a spacecraft that's orbiting Earth, here's where they can do that.*
- *If they are interested in making their own rockets, we'll help them.*

Learning Points

Modal Verbs in the Passive Voice

You use modal verbs to add meaning to other verbs. They come before the dictionary form (infinitive without *to*) of the main verb.

Modal verbs can add meaning connected with certainty or obligation.

You can use modal verbs in the passive voice.

You use the passive voice when you want to focus on the "receiver" of the action, rather than the "doer" of the action.

The form of a passive sentence, with a modal, is:

Subject + modal + to be + past participle

For example:

Simulators would be used so they could experience what it's like to be in the heavens.

Examples:

- *They would get to experience what astronauts go through on a space mission.*
- *Simulators would be used so they could experience what it's like to be in the heavens.*
- *Space camp is where they can do that.*
- *They might even be persuaded to try freeze-dried space food.*
- *By the end of the program, campers should be prepared for the final test.*
